Attitudes to School Survey

The Attitudes to School survey is completed annually by the children in grades 5 and 6 and it is a measure of their feelings about student relationships, wellbeing and teaching and learning. The 2016 survey has been completed and the outcomes for our school are excellent with the data indicating improvement in all categories over a three year period. Significantly, the children who were in grade five last year and are now in grade six feel safer, more confident, cared for, happier and challenged in the classroom according to this survey.

The data obtained from this survey is very important to the school and leads us to provide programs and practices to further improve the satisfaction of the children at the school.

We have fantastic children at the school who are well supported by their teachers and other staff who work here. We must continue to build positive relationships with everyone in the school community and strive to further improve outcomes for the children.

Public Speaking Awards

The Lions Club Public Speaking event that took place last Wednesday evening was fantastic. The children were very well prepared, which is a credit to their teachers, parents and anyone else who coached them to perform at this level. I was very proud of the manner in which they represented the school and the effort they put into their presentations.

Knights News—Round nine

Both teams tackled the cold, frosty conditions to produce two skilled games for our spectators to watch on our home ground last Saturday. In both games, our mighty Knights were demonstrating control of the ball around the ground, fantastic passages of play and some tight and specky contests. So exciting to see the improvements from our players each week. Their continuing support and encouragement for each other on and off the field has been magical!! Keep it up Knights.
